Sycophancy / Qwen2.5-7B-Instruct: pair-level direction strength (angle plain vs. reweighted = 60.1°)
Projection onto PLAIN DiM direction
(47.8% of pairs have a_i < 0)
count
$a_i = \mu_{plain} \cdot z_i$
Projection onto REWEIGHTED direction
(47.8% of pairs have a_i < 0)
count
$a_i = \hat{\mu}_{rw} \cdot z_i$
Per-pair alignment vs. noise
(color = final reweight-algorithm weight)
τ_i (out-of-direction noise)
a_i (alignment, plain-DiM axis)
weight w_i
Reweighting profile
(effective N_eff = 261.0 of 500)
uniform (1/N=0.0020)
weight w_i
pair rank (sorted by weight, descending)
